Change Secure Access Code Delivery Method

To change your secure access code delivery method, go to *Settings*, then *Security Preferences*.	Click *Secure Access Code Delivery*.	This shows your current choices. To delete an existing item, click the trash can icon. To add a new text or voice number, click the button to add a new text or voice number. After making the change, click the checkmark to confirm.	To edit an existing item, click the pencil icon next to the one to change. If editing an existing number, you'll need to receive a secure access code to confirm the change. If none of these methods are available to you, contact our customer care center at 707-524-3000.	Enter the secure access code you received, click Verify. You'll receive a confirmation on the screen your changes were saved.
